

**Comprehensive Care Management
Health Homes for Adults**

Care for Adults

In response to the needs of the individuals we support, Intandem is proud to have joined together with Health Homes of Upstate New York (HHUNY) to provide Care Management Services that put people first.

This service model has been created in order to provide quality care management to adults with needs in the region, by partners experienced in both managing and providing care.

What is a health home?

A Health Home is a care management service model where ALL of an individual's caregivers communicate with one another so that a person's needs are addressed appropriately.

Intandem will provide a care manager to eligible adults to provide access to services assuring they have everything they need to stay healthy and out of the hospital. The Care Manager supports services that an individual may already be receiving and will help the individual get new ones of necessary.

Health Records are shared confidentially among providers so that services are not duplicated or neglected. Services are provided through a network of organizations. When the services are considered collectively, they become a virtual "Health Home"

What is a health home?

Medicaid recipients, including those who are already members of a Managed Care Organization as well as Individuals who have both Medicaid and Medicare are eligible.

Those eligible need to meet one of the following:

- Two or more chronic health conditions such as asthma, diabetes, heart disease, mental health condition or substance abuse disorder, (list of chronic conditions) or
- A significant Mental Illness, or
- Living with HIV/AIDS

Contact Intandem for more information or if you are eligible.
